Company Profile

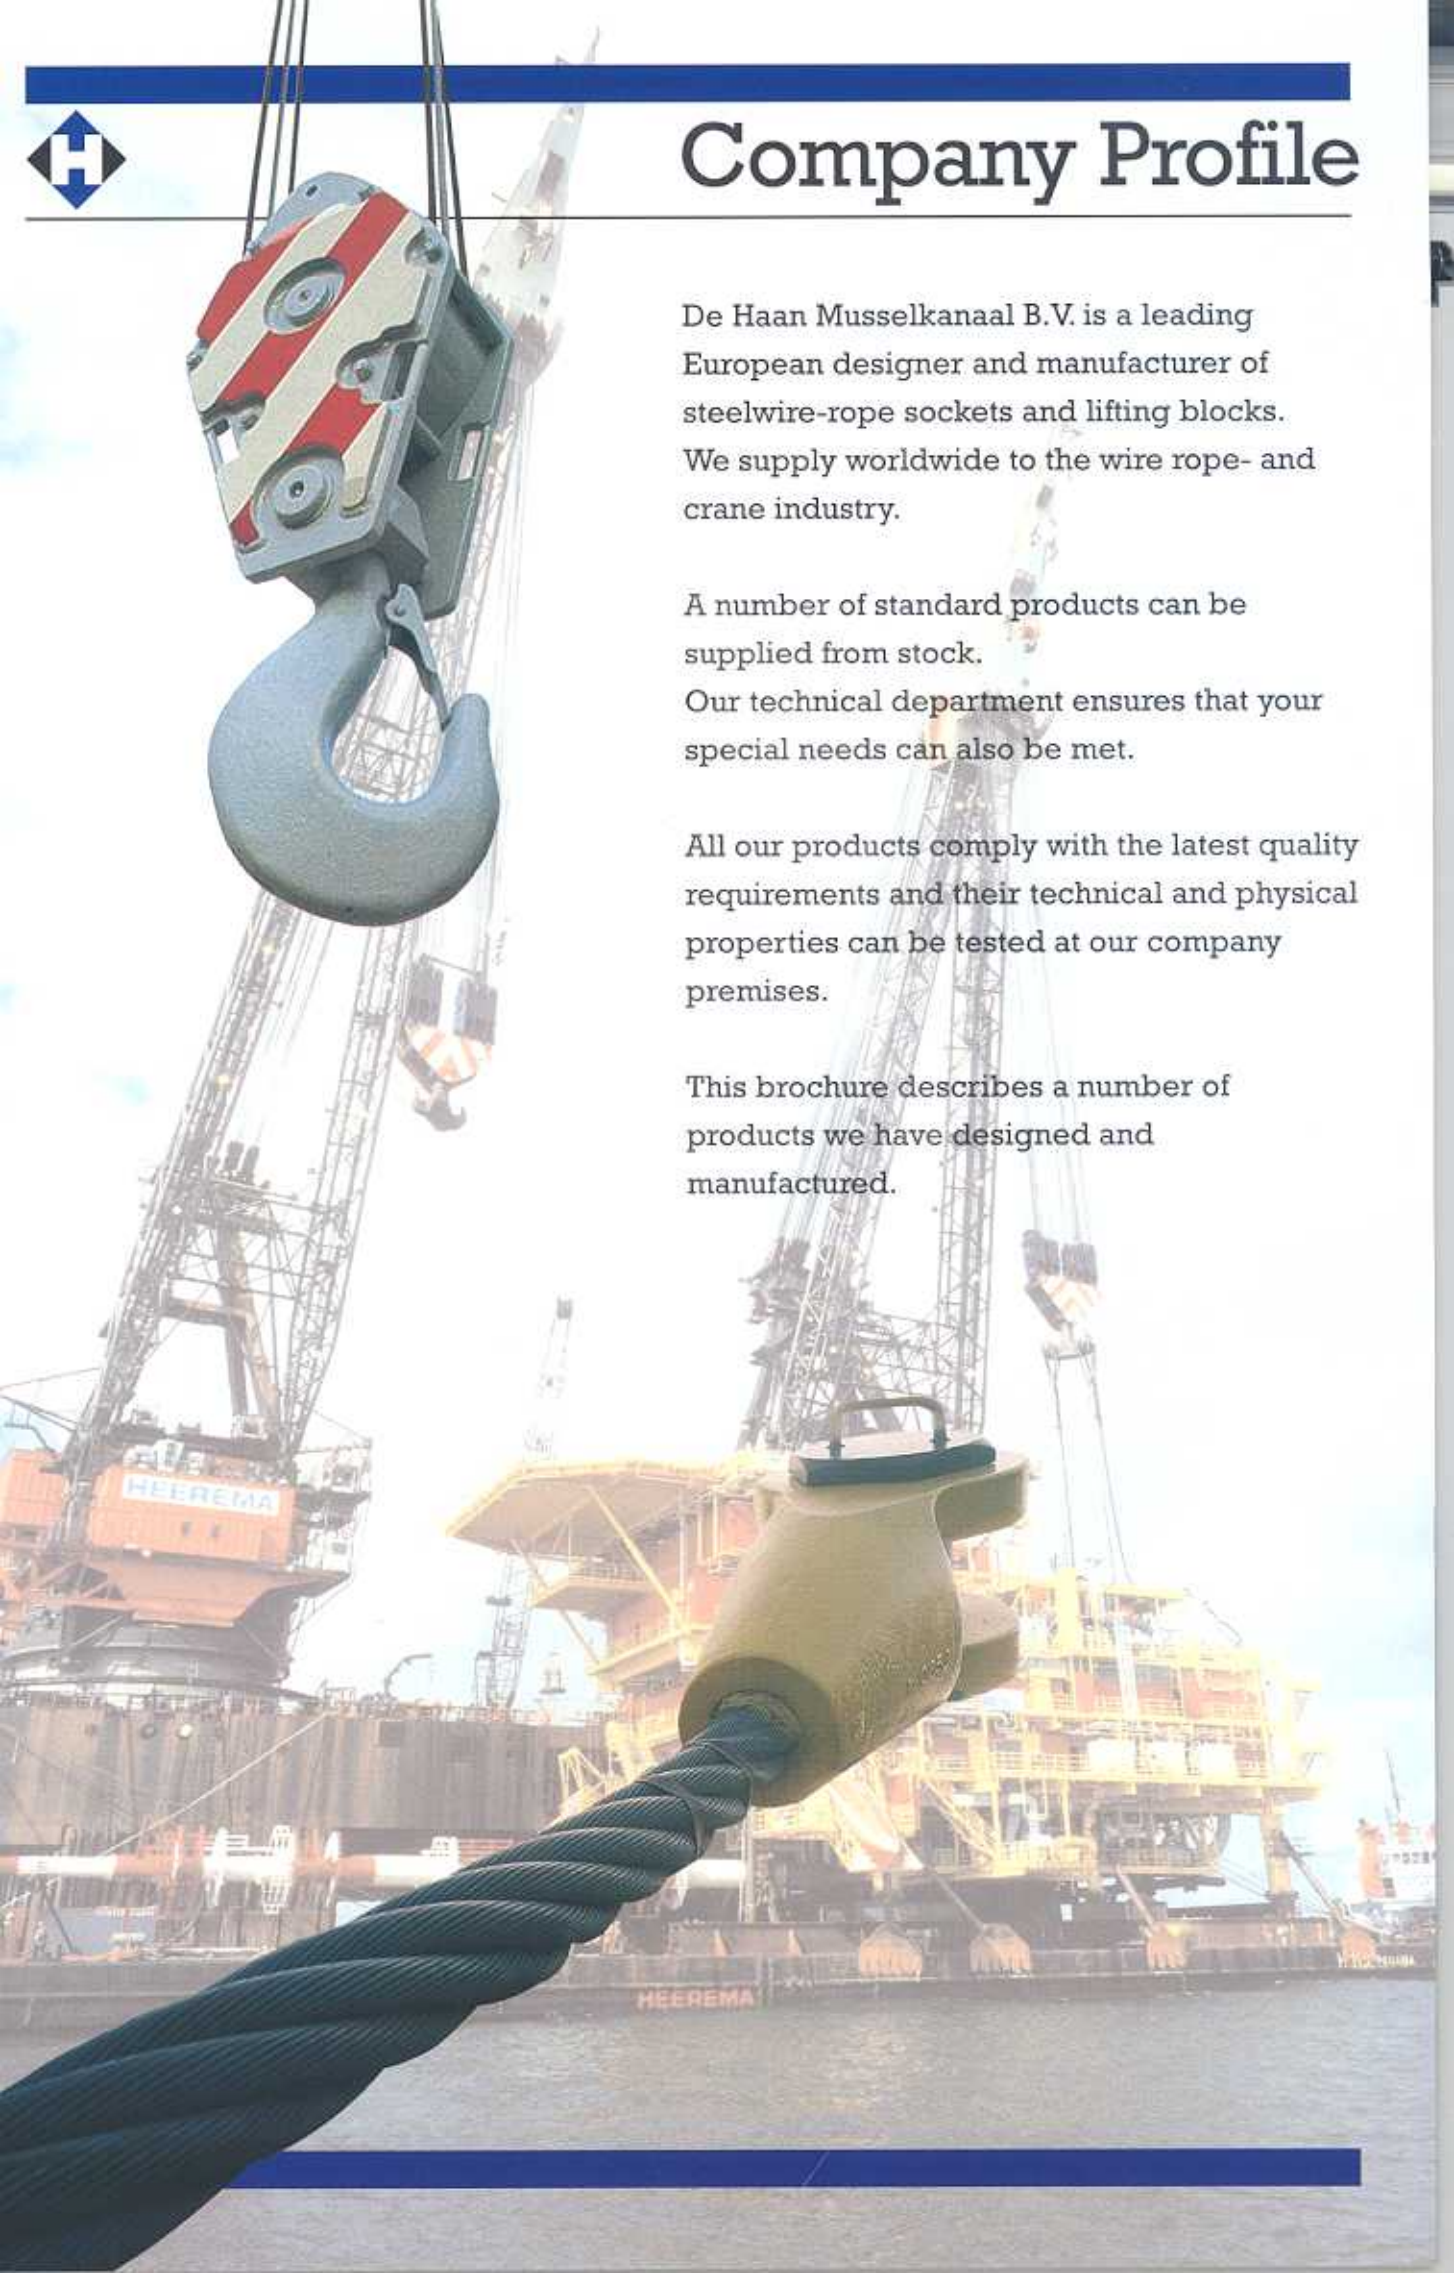

De Haan Musselkanaal B.V. is a leading European designer and manufacturer of steelwire-rope sockets and lifting blocks. We supply worldwide to the wire rope- and crane industry.

A number of standard products can be supplied from stock.

Our technical department ensures that your special needs can also be met.

All our products comply with the latest quality requirements and their technical and physical properties can be tested at our company premises.

This brochure describes a number of products we have designed and manufactured.

Blocks

1, 3, 5 and 7 sheaves hook blocks in every desired lifting capacity for the mobile crane industry.

Lifting blocks for dock and ships cranes.

Swivels for the mobile crane industry with lifting capacities between 2 and 50 tonnes.

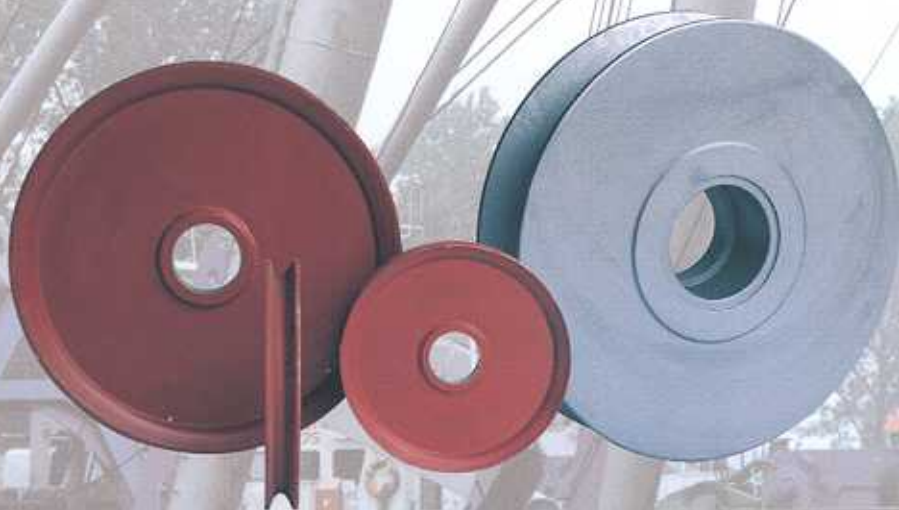

Using standard components, De Haan Musselkanaal B.V. can supply an unlimited range of hook blocks and swivel hooks. The hook blocks and swivel hooks can be supplied at short notice.

We also design and manufacture other specially-constructed hoisting equipment and wire rope fairlead systems.

Hook blocks for crawler cranes and floating cranes.

Equalizers up to 250 tonnes and a width of 12 metres.

Sockets

Open spelter sockets for
18 mm to 167 mm steel wire.

Closed spelter sockets for
20 mm to 167 mm steel wire.

De Haan Musselkanaal B.V.
supplies a complete range
of open-, closed- and open
wedge sockets.

In addition to these we also
supply our latest design
CR socket.

All sockets can be supplied
with a manufacturers- and
traceability certificate.

Open wedge sockets as removable
wire rope end fitting
for 9 mm to 75 mm wire rope.

CR sockets have been
specifically designed as the best
way to connect a wire rope-
to a chain system.

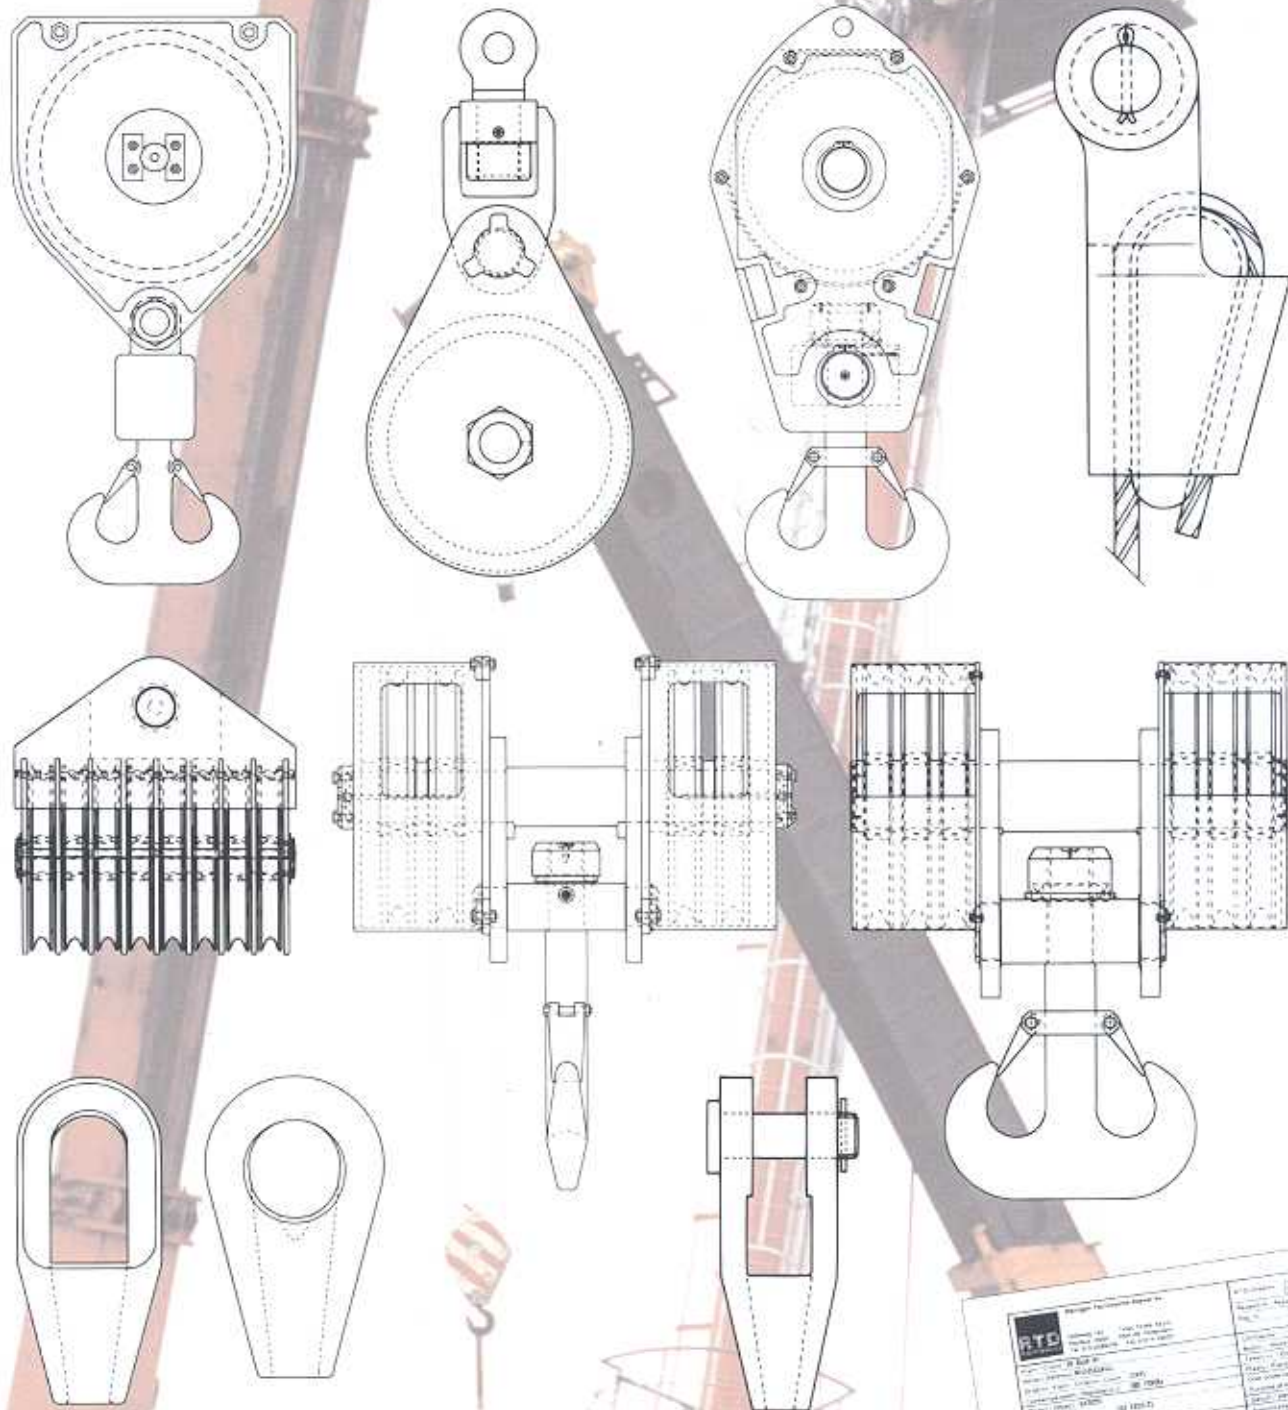

These sockets have the
NRS-system, which prevents the
tamp from turning or moving.

Load testing of our products can be carried out on request.
An ultrasonic/magnetic examination is also possible.
